Welcome

Thank you for purchasing Nivora Invoice Generator & Payment Tracker. This spreadsheet helps freelancers, consultants, and independent professionals create invoices, track payments, manage clients, and monitor revenue - all in one file.

No special skills needed. Just fill in the highlighted input cells - everything else calculates automatically.

Workbook Overview

The workbook contains 7 tabs:

Start Here	Setup instructions and navigation
Dashboard	Revenue KPIs, invoice status, monthly trends, top clients
Clients	Client directory with contact details and status tracking
Invoice Register	All invoices with auto-calculated status
Payment Tracker	All payments received, linked to invoices automatically
Invoice Generator	Printable invoice with auto-calculated totals
Settings	Currency, tax rate, dropdown values

Important: Cells with gray background contain formulas - do not edit them. Cells with white or green background are for your input.

Quick Start

- Open the file - Use the Google Sheets copy link, or open the XLSX in Excel
- Go to Settings first - Set your currency symbol and default tax rate
- Add your clients - Enter client details in the Clients tab
- Create invoices - Use the Invoice Generator or enter invoices in the Invoice Register
- Track payments - Log payments in the Payment Tracker tab
- View your Dashboard - All metrics update automatically

Dashboard

The Dashboard tab shows your business at a glance with real-time KPI cards, monthly revenue breakdown, invoice status breakdown, and your top clients.

KPI Cards

Total Revenue, Paid Revenue, Outstanding Revenue, Total Invoices, Paid/Unpaid/Overdue counts, Active Clients, and Average Invoice Value.

Revenue by Month

Monthly revenue breakdown showing trends over time.

Invoice Status Breakdown

Paid, Sent, Partial, Overdue, and Draft counts at a glance.

Top Clients by Revenue

Your highest-value clients ranked by revenue.

Invoice Register

The Invoice Register is your master log of all invoices. Each entry includes Invoice ID, Date, Due Date, Client, Description, Subtotal, Tax Rate, Tax Amount, Total, Amount Paid, Outstanding Balance, and Status.

Auto-Calculated Status

Status is calculated automatically:

- Paid: Amount Paid equals Total
- Overdue: Past due date and not fully paid
- Partial: Amount Paid is between \$0 and Total
- Sent: Not overdue, no payment received
- Draft: Manual override only (set via Settings)

Payment Tracker

The Payment Tracker logs all payments received. Each entry includes Payment ID, Invoice ID, Client Name (auto-populated via VLOOKUP), Payment Date, Payment Method, Amount, and Notes.

Simply enter the Invoice ID and the client name fills in automatically. Payment methods are customizable in the Settings tab.

Payment ID	Invoice ID	Client Name	Payment Date	Payment Method	Amount	Notes

Troubleshooting

#REF! error in formulas

Solution: You may have deleted a referenced cell or sheet. Check that all 7 tabs are present.

#VALUE! error in formulas

Solution: Check that you entered numbers in cells expecting numeric values (Quantity, Rate, Amount).

Dashboard not updating

Solution: Make sure you entered invoices in the Invoice Register tab.

Dropdown not showing options

Solution: Check the Settings tab - dropdown values are configured there.

Invoice Generator total wrong

Solution: Verify Subtotal, Tax Rate, and Amount Paid. $\text{Total} = \text{Subtotal} + \text{Tax}$.

Client Name not in Payment Tracker

Solution: Check that the Invoice ID exists in the Invoice Register with a valid Client Name.

Google Sheets shows #REF! errors

Solution: Use the Google Sheets copy link for best results.
